

# Enhance Resident Quality of Life and Differentiate Your Facility

*Evidence-Based Clinical Programs That Help Your Residents Age in Place*

In today's changing healthcare environment, assisted living facilities face challenges ranging from improving patient quality of life, controlling facility costs and competitive market differentiation. ACP offers solutions that are proven to enhance treatment efficiency and effectiveness, reduce costs and improve patient satisfaction and referrals, enabling you to focus on making your residents feel at home.

## Evidence-Based Clinical Programs

Used by assisted living facilities nationwide, our evidence-based clinical programs combine innovative rehabilitation technologies with customized clinical protocols and pathways, advanced therapist training and ongoing support by ACP's licensed physical and occupational therapists. Our comprehensive programs provide the most effective pathways to treatment for your patients while ensuring your staff has the one-on-one support needed to improve patient outcomes so they can comfortably age in place.

Fall Prevention & Balance
