

Build a Stronger Clinical Practice and Achieve Superior Outcomes

Evidence-based Clinical Programs That Differentiate Your Outpatient Clinic

In today's changing healthcare environment, outpatient clinics face significant challenges including the need to differentiate your clinic from your competition and attract new referrals while continuing to grow your business. ACP's proven evidence-based clinical programs address many of these challenges by enabling clinics to deliver superior treatment outcomes for a broader range of conditions, while expanding your practice for new clinical offerings and referrals.

Evidence-Based Clinical Programs

Used by outpatient clinics nationwide, including professional sports teams and training facilities such as IMG Academy, our clinical programs combine innovative rehabilitation technologies with customized clinical protocols and pathways, advanced therapist training and ongoing support by ACP's licensed physical and occupational therapists. These comprehensive programs provide the most effective pathways for your patients while ensuring your staff has the one-on-one support needed to improve your outcomes.

Neuro Rehab

Pain Management

Cardiopulmonary

Continence Improvement

Orthopedics

ACP's evidence-based clinical programs lead to greater patient functional improvement in Self-Care and Mobility Outcomes as compared to patients with traditional therapy:

23%
greater functional improvement in mobility outcomes*

11%
greater functional improvement in self-care outcomes*

*ACP Outcomes Study by The Moran Company

“The positive trends shown by our data support not just the efficacy of the interventions suggested in the clinical pathways, including physical agent modalities and therapeutic exercises, but also the value in ensuring continuity of care through clinical education.”

– ALLEN HARDIN, ATC, PT, SCS, ATHLETIC TRAINER & SPORTS PHYSICAL THERAPIST

ACP’s Evidence-Based Clinical Programs Benefits:

- Improve outcomes and optimize functional gains
- New treatment options for patients whose therapy progress has plateaued
- Enables therapists to accelerate recovery and improve outcomes for sports related injuries
- Elevate therapist skills and ability to integrate rehab technology into practice
- Differentiate your clinic and attract new referrals
- Introduce new revenue opportunities through expanded therapy service offerings and wellness programs
