

Help Your Patients Reduce Pain with ACP's Pain Management Program

Effective Drug-Free Treatment Alternative to Opioids

According to the National Center for Health Statistics, approximately 76.2 million, one in every four Americans, have suffered from pain that lasts longer than 24 hours and millions more suffer from acute pain. Chronic pain is the most common cause of long-term disability. Being able to effectively manage pain, in a drug-free way, is critical for your patients to reach their goal of living an active, pain-free life.

ACP's pain management program combines innovative rehabilitation technologies with customized clinical protocols and pathways, advanced therapist training and ongoing support by ACP's licensed physical and occupational therapists. This drug-free and highly customizable approach incorporates exercise augmented with rehab technologies such as electrotherapy, ultrasound and diathermy along with proven protocols and pathways to help manage pain and effectively and efficiently improve patient outcomes.

ACP'S PAIN MANAGEMENT PROGRAM WILL:

HELP YOUR PATIENTS:

- Reduce pain
- Increase exercise tolerance
- Improve quality of life
- Gain strength and mobility
- Improve sleep and appetite

SUPPORT YOUR CLINIC GOALS TO:

- Identify chronic pain risk factors
- Reduce costs and burden of care
- Strengthen census and referrals
- Reduce hospital recidivism
- Differentiate your clinic in the marketplace

On average, ACP customers have a 12% better short-stay pain management ratings and 7% better long-stay pain management ratings compared to non-ACP customers.

– 2017 THE MORAN COMPANY FIVE-STAR RATINGS STUDY

“Both the training and equipment provided by ACP have been exceptional. Our residents have benefited greatly from their programs, including pain, falls, and wound management to name a few.”

– ROBYN HARVELL, REGIONAL MANAGER, WAYNE COUNTY NURSING HOME

EVIDENCE-BASED CLINICAL PROGRAM – PAIN MANAGEMENT

| INNOVATIVE REHAB TECHNOLOGIES | CLINICAL SERVICES |
|---|---|
| <p>OmniVersa® Electrotherapy and ultrasound combination therapy system that includes integrated, evidence based clinical protocols and offers ultrasound and a variety of electrical stimulation waveforms to effectively address and improve neuromuscular function.</p> | <p>Education & Training CEU-approved courses provide clinicians with the most current in-depth information on comprehensive assessment and treatment interventions for pain management.</p> |
| <p>OmniSWD® Shortwave diathermy system with integrated indication navigation helps increase circulation and reduce pain and inflammation, decrease joint stiffness, relieve muscle spasms and increase local blood flow. Applied to the patient through a large applicator, OmniSWD may be used to assist in the treatment of soft tissue injuries, slow healing wounds and arthritis.</p> | <p>Treatment Pathways & Protocols Clinical protocols designed to guide clinicians to implement skilled, evidence-based rehabilitation programs for patients dealing with pain.</p> |
| <p>OmniCycle® Therapeutic exercise system with motor-assist technology and biofeedback driven exercise programs to accommodate lower functioning patients with strength, coordination, orthopedic, neurologic or cardiopulmonary challenges.</p> | <p>Caseload Consultation Ongoing assessment of clinical needs and development of customized intervention strategies to improve patient and facility performance in important quality measures.</p> |
| <p>OmniVR® Virtual Reality System designed to improve exercise participation, repetition, balance and cognitive function by re-creating the patient’s movements in a 3-D, real-time interactive experience. When immersed in virtual reality, the patient demonstrates greater motivation, exercise intensity and repetitions. Integrated CARE Item Set.</p> | <p>Clinic Differentiation Tailored marketing programs to help you highlight your superior practices and results to differentiate your clinic and improve census.</p> |
| <p>OmniStand® Fall-safe dynamic balance system designed to assist therapists in working with their patients one-on-one to perform balance, pre-gait and standing tolerance exercises. Enables 0°, 6°, 11° of sway in all planes to challenge patients dynamic balance reactions.</p> | |
