

# Improve Patient Outcomes and Quality Ratings

*Evidence-Based Clinical Programs for Your Skilled Nursing Facility*

In today's changing healthcare environment, skilled nursing facilities (SNF) face significant challenges including increasing demand to prove quality care and outcomes, increasing costs, and the continual need to attract new referrals. ACP offers solutions that are proven to reduce costs, improve treatment efficacy and effectiveness and increase patient satisfaction.

## Evidence-Based Clinical Programs

Used by thousands of skilled nursing facilities nationwide, including the most recognized providers in the industry, our clinical programs combine innovative rehabilitation technologies with customized clinical protocols and pathways, advanced therapist training and ongoing support by ACP's licensed physical and occupational therapists. These comprehensive programs provide the most effective pathways for your patients while ensuring your staff has the one-on-one support needed to improve your outcomes.

Fall Prevention & Balance

Neuro Rehab

Pain Management

Cardiopulmonary

Dysphagia

Wound Management

Continence Improvement

Orthopedics

ACP's evidence-based clinical programs lead to greater patient functional improvement in self-care and mobility outcomes as compared to patients with traditional therapy:

**23%**  
greater functional improvement in mobility outcomes\*

**11%**  
greater functional improvement in self-care outcomes\*

\*ACP Outcomes Study by The Moran Company

***“I’ve enjoyed ACP in several of my rehab units, and found patient outcomes and staff satisfaction to be exceptional.”***

– RICHARD MAPES, FACILITY ADMINISTRATOR, WESLEY PARK CENTRE

## **ACP’s Evidence-Based Clinical Programs Benefits:**

- Improve outcomes and optimize functional gains
- Manage pain and edema effectively to allow earlier, more intensive therapy interventions
- New treatment options for patients whose therapy progress has plateaued
- Elevate therapist skills and ability to integrate rehab technology into practice
- Differentiate your clinic and increase volume of referrals
- Improve quality assurance with proactive management of quality indicators, surveys, regulatory compliance and documentation
- Manage routine costs

### **EFFECTIVE AND EFFICIENT TREATMENT OPTIONS FOR PREVALENT GERIATRIC CONDITIONS INCLUDING:**

Pain | Edema | Post-Acute Orthopedic TKA and THA | Stroke Recovery  
Neuromuscular Dysfunction | Contractures | Rheumatoid Arthritis | Knee Osteoarthritis  
COPD | Herpes Zoster | Fall Prevention | Continence Improvement | Wound Healing
